Subject Index of Volume 646

Ab initio calculations
Very strong anionic homoaromaticity in (*deloc*-1,3,4)-1-sila-3,4-diboracyclopentane-1-ides, the importance of the energy of the reference system for homoaromatic stabilization energies, 262
Acetylenes
Synthesis and reactivity of P-acetylenic (silylamino)phosphines, 223
Acrylate
Enantioselective synthesis of phosphinyl peptidomimetics via an asymmetric Michael reaction of phosphinic acids with acrylate derivatives, 212
Activation parameters
Syntheses, structure, and Berry pseudorotation of ruthenium-, iron-, and cobalt-phosphorane complexes, 204
Acyclic
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Aldehyde trimethysilylcyanation
$P(MeNMCH_2CH_2)_3N$: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161
Alkene analogues
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Alkynes
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $[^1J(^{119}Sn, ^{13}C)]$, 125
Alkynyliodonium salt
1,3-Dipolar cycloaddition of alkynyliodonium salts with a nitrile oxide. Synthesis and reactivity of isoxazolyliodonium salts, 196
Aluminate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Aluminum
Imido analogs of aluminophosphates: syntheses and X-ray structures of $\{LiAl[OP(N^tBu)_2(NH^tBu)]_2\}_2$ and the mono- and di-methylaluminum complexes of the anions $[OP(N^tBu)_x(NH^tBu)_{3-x}]^-$ ($x = 1, 2$), 107
Ambident anions
Metalated 1,3-azaphospholes: synthesis of lithium-1,3-benzazaphospholides and reactivity towards organoelement and organometal halides, 113
Aminophosphine catalyst
$P(MeNMCH_2CH_2)_3N$: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161
Aminotin compounds
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $[^1J(^{119}Sn, ^{13}C)]$, 125
Anions
Very strong anionic homoaromaticity in (*deloc*-1,3,4)-1-sila-3,4-diboracyclopentane-1-ides, the importance of the energy of the reference system for homoaromatic stabilization energies, 262
Asymmetric Michael reaction
Enantioselective synthesis of phosphinyl peptidomimetics via an asymmetric Michael reaction of phosphinic acids with acrylate derivatives, 212
Azayldiide
Lithium phosphonium azayldiides R_3P–NLi. Applications in organic synthesis and coordination chemistry, 94

Berry pseudorotation
Syntheses, structure, and Berry pseudorotation of ruthenium-, iron-, and cobalt-phosphorane complexes, 204
Bicyclic phosphazane
$P(MeNMCH_2CH_2)_3N$: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161
Bisphosphine
Synthesis of 1,2-bis[(diorgano)phosphino]ethanes via Michaelis–Arbuzov type rearrangements, 230
Bis(sulfinylamido)
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Bis(trifluoromethane)sulfonimide
Bis(trifluoromethane)sulfonimide initiated ring-opening polymerization of octamethylcyclotetrasiloxane, 171
α,ω-Bis(trimethylsilyl)-polydimethylsiloxanes
Bis(trifluoromethane)sulfonimide initiated ring-opening polymerization of octamethylcyclotetrasiloxane, 171
Boron
Very strong anionic homoaromaticity in (*deloc*-1,3,4)-1-sila-3,4-diboracyclopentane-1-ides, the importance of the energy of the reference system for homoaromatic stabilization energies, 262
Bromide
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Bromination
Synthesis of 2H-1,2-oxaphosphorin 2-oxides, 153

Cage bonding
Heteroboranes of the p-block elements, 21
^{13}C- and ^{29}Si-NMR
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Carbene analogues
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Catalysis
Transformations of organosilanes by Pt(II) complexes with hemilabile P,N-chelating ligands, 53

PII: S0022-328X(02)01182-8

Chelating ligands
Synthesis of 1,2-bis[(diorgano)phosphino]ethanes via Michaelis–Arbuzov type rearrangements, 230
Chiral auxiliary
Enantioselective synthesis of phosphinyl peptidomimetics via an asymmetric Michael reaction of phosphinic acids with acrylate derivatives, 212
Chloride
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Chloro
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
CO_2 insertion
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Coordination
Lithium phosphonium azaylidiides R_3P–NLi. Applications in organic synthesis and coordination chemistry, 94
Coordination number
The coordination number–photophysical properties relationship of trianthrylphosphorus compounds: doubly locked fluorescence of anthryl groups, 277
Crystal structure
Octakis[(2,2,6,6-tetramethylpiperidino)methyl]octasilsesquioxane: synthesis and crystal structure analysis of a new aminoorganyl-functionalized octasilsesquioxane, 200
Crystal structures
New synthetic approach and structural characterization of the chloroalkylstannanes $(Cl–CH_2)_n SnCl_{4-n}$ ($n = 2, 4$) and the hydrolysis product $[(ClCH_2)_2Sn(Cl)–O–Sn(Cl)(CH_2Cl)_2]_2$, 138
Tetrakis[lithium-*tert*-butyl(di-*tert*-butylfluorosilyl)amide]-dilithium oxide, $(^tBu_2SiF–NLi^tBu)_4Li_2O$—a Li_6O^{4+}-cluster, 134
Cyclic phosphite systems
Photo-Arbuzov rearrangements of cyclic phosphite systems, 239
Cyclization
Synthesis of heterocycles by cyclization of unsaturated organolithiums: a review, 59
Cyclometallation
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered $ArPCl_2$ in solution at room temperature, 255
Cyclopentadienes
Cp^*GaCl_2 and Cp^*_2GaCl ($Cp^* = \eta^1$-C_5Me_5) as starting materials for novel Group 13 element complexes, 247

Dehydrobromination
Synthesis of 2H-1,2-oxaphosphorin 2-oxides, 153
Desulfurisation
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Diazomethane
New synthetic approach and structural characterization of the chloroalkylstannanes $(Cl–CH_2)_n SnCl_{4-n}$ ($n = 2, 4$) and the hydrolysis product $[(ClCH_2)_2Sn(Cl)–O–Sn(Cl)(CH_2Cl)_2]_2$, 138
Dicoordinate phosphorus
Phosphametallocenes: from discovery to applications, 15
Diene analogues
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Diphosphene
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered $ArPCl_2$ in solution at room temperature, 255
1,3-Dipolar cycloaddition
1,3-Dipolar cycloaddition of alkynyliodonium salts with a nitrile oxide. Synthesis and reactivity of isoxazolyliodonium salts, 196
Distannoxanes
New synthetic approach and structural characterization of the chloroalkylstannanes $(Cl–CH_2)_n SnCl_{4-n}$ ($n = 2, 4$) and the hydrolysis product $[(ClCH_2)_2Sn(Cl)–O–Sn(Cl)(CH_2Cl)_2]_2$, 138
Ditellurium
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
1,2-Dithia-3,4,5-triazolium
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80

Electron pair
Heteroboranes of the p-block elements, 21
Exchange reactions
Transformations of organosilanes by Pt(II) complexes with hemilabile P,N-chelating ligands, 53

Ferrate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Fluorescence
First siloxane tethered paracyclophane, 167
Fluorescence spectra
The coordination number–photophysical properties relationship of trianthrylphosphorus compounds: doubly locked fluorescence of anthryl groups, 277
Fluoride
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Fluoro
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80

Gallanate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Gallium
Cp^*GaCl_2 and Cp^*_2GaCl ($Cp^* = \eta^1$-C_5Me_5) as starting materials for novel Group 13 element complexes, 247
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, $[M(\eta^5\text{-}P_3C_2Bu^t_2)]$, M = Ga, Tl, 191
Gallium NMR
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, $[M(\eta^5\text{-}P_3C_2Bu^t_2)]$, M = Ga, Tl, 191
Germanium
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Group 13 metals
Chemical applications of topology and group theory. Part 36. Deltahedral and fused deltahedral organometallic gallium and indium clusters, 146

α-Halogenoalkylstannanes
New synthetic approach and structural characterization of the chloroalkylstannanes $(Cl–CH_2)_n SnCl_{4-n}$ ($n = 2, 4$) and the hydrolysis product $[(ClCH_2)_2Sn(Cl)–O–Sn(Cl)(CH_2Cl)_2]_2$, 138
Heteroboranes
Heteroboranes of the p-block elements, 21

Heterocycles
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125
Synthesis of heterocycles by cyclization of unsaturated organolithiums: a review, 59
Heterocyclic
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Heteronuclear coupling constants
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Homoaromaticity
Very strong anionic homoaromaticity in (*deloc*-1,3,4)-1-sila-3,4-diboracyclopentane-1-ides, the importance of the energy of the reference system for homoaromatic stabilization energies, 262
Homogeneous catalysis
Phosphametallocenes: from discovery to applications, 15
Synthesis of 1,2-bis[(diorgano)phosphino]ethanes via Michaelis–Arbuzov type rearrangements, 230
2*H*-1,2-Oxaphosphorin 2-oxide
Synthesis of 2H-1,2-oxaphosphorin 2-oxides, 153
Hydrolysis
Tetrakis[lithium-*tert*-butyl(di-*tert*-butylfluorosilyl)amide]-dilithium oxide, (^{t}Bu$_2$SiF–NLi^{t}Bu)$_4$Li$_2$O—a Li_6O^{4+}-cluster, 134
Hypercoordinate silicon
P(MeNMCH$_2$CH$_2$)$_3$N: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161
Hypervalent bonds
Syntheses, structure, and Berry pseudorotation of ruthenium-, iron-, and cobalt-phosphorane complexes, 204

Imido derivatives
Imido analogs of aluminophosphates: syntheses and X-ray structures of $\{LiAl[OP(N^tBu)_2(NH^tBu)]_2\}_2$ and the mono- and di-methylaluminum complexes of the anions $[OP(N^tBu)_x(NH^tBu)_{3-x}]^-$ ($x = 1, 2$), 107
Indium
Cp*GaCl$_2$ and Cp$^*_2$GaCl (Cp* = η^1-C$_5$Me$_5$) as starting materials for novel Group 13 element complexes, 247
Intermediates
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Interpretation
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Intramolecular carbolithiation
Synthesis of heterocycles by cyclization of unsaturated organolithiums: a review, 59
Isoxazolyliodonium salt
1,3-Dipolar cycloaddition of alkynyliodonium salts with a nitrile oxide. Synthesis and reactivity of isoxazolyliodonium salts, 196

Ketone trimethylsilylcyanation
P(MeNMCH$_2$CH$_2$)$_3$N: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161

Lead
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Lithium aluminumhydride
Reaction pathways towards 1,1,2,2-tetra^{t}butyldistannanes, 271
Lithium benzazaphospholides
Metalated 1,3-azaphospholes: synthesis of lithium-1,3-benzazaphospholides and reactivity towards organoelement and organometal halides, 113
Lithium-(fluorosilyl)amide
Tetrakis[lithium-*tert*-butyl(di-*tert*-butylfluorosilyl)amide]-dilithium oxide, (^{t}Bu$_2$SiF–NLi^{t}Bu)$_4$Li$_2$O—a Li_6O^{4+}-cluster, 134
Low-coordinate phosphorus
Metalated 1,3-azaphospholes: synthesis of lithium-1,3-benzazaphospholides and reactivity towards organoelement and organometal halides, 113
Low valent Group 13 elements
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, [M(η^1-P$_3$C$_2$Bu$^t_2$)], M = Ga, Tl, 191

Magnesium
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered ArPCl$_2$ in solution at room temperature, 255
Metallaboranes
Heteroboranes of the p-block elements, 21
Metallaphosphorane
Syntheses, structure, and Berry pseudorotation of ruthenium-, iron-, and cobalt-phosphorane complexes, 204
Metallophosphines
Metalated 1,3-azaphospholes: synthesis of lithium-1,3-benzazaphospholides and reactivity towards organoelement and organometal halides, 113
meta-Terphenyl
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered ArPCl$_2$ in solution at room temperature, 255
Metathesis
Cp*GaCl$_2$ and Cp$^*_2$GaCl (Cp* = η^1-C$_5$Me$_5$) as starting materials for novel Group 13 element complexes, 247
Michaelis–Arbuzov rearrangements
Synthesis of 1,2-bis[(diorgano)phosphino]ethanes via Michaelis–Arbuzov type rearrangements, 230
Monomeric, dimeric and tetrameric forms
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Multinuclear
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125
Multiple bonding
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Multistep reactions
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80

Nitrile
Lithium phosphonium azaylidiides R$_3$P–NLi. Applications in organic synthesis and coordination chemistry, 94
Nitrile oxide
1,3-Dipolar cycloaddition of alkynyliodonium salts with a nitrile oxide. Synthesis and reactivity of isoxazolyliodonium salts, 196
NMR
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125

N[Te(X)NSN]$_3$, X = F, Cl
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80

Octamethylcyclosiloxane
Bis(trifluoromethane)sulfonimide initiated ring-opening polymerization of octamethylcyclotetrasiloxane, 171
Octasilsesquioxane
Octakis[(2,2,6,6-tetramethylpiperidino)methyl]octasilsesquioxane: synthesis and crystal structure analysis of a new aminoorganyl-functionalized octasilsesquioxane, 200
μ6–OLi$_6$ coordination
Tetrakis[lithium-*tert*-butyl(di-*tert*-butylfluorosilyl)amide]
-dilithium oxide, (^{t}Bu$_2$SiF–NLi^{t}Bu)$_4$Li$_2$O—a Li$_6$O^{4+}-cluster, 134
Organo Al(I) and (II)
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Organoboranes
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125
1,1-Organoboration
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125
Organolithiums
Synthesis of heterocycles by cyclization of unsaturated organolithiums: a review, 59
Organometallic clusters
Chemical applications of topology and group theory. Part 36. Deltahedral and fused deltahedral organometallic gallium and indium clusters, 146
Organosilicon chemistry
The quest for triplet ground state silylenes, 68
Organosilylboranes
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Organotin
Novel organotin halides. Organometallic substituted stannoles and alkene derivatives with tin–chlorine and tin–bromine bonds—exceptionally small magnitude of coupling constants $|^1J(^{119}Sn, ^{13}C)|$, 125

P-acetylenic
Synthesis and reactivity of P-acetylenic (silylamino)phosphines, 223
Palladium catalyst
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Paracyclophanes
First siloxane tethered paracyclophane, 167
Paramagnetic species
Phosphametallocenes: from discovery to applications, 15
p-Block elements
Heteroboranes of the p-block elements, 21
Pentacoordinate silicon
Octakis[(2,2,6,6-tetramethylpiperidino)methyl]octasilsesquioxane: synthesis and crystal structure analysis of a new aminoorganyl-functionalized octasilsesquioxane, 200
Phosphametallocene
Phosphametallocenes: from discovery to applications, 15
Phosphate
Imido analogs of aluminophosphates: syntheses and X-ray structures of $\{LiAl[OP(N^tBu)_2(NH^tBu)]_2\}_2$ and the mono- and di-methylaluminum complexes of the anions $[OP(N^tBu)_x(NH^tBu)_{3-x}]^-$ (x = 1, 2), 107
Phosphines
Synthesis and reactivity of P-acetylenic (silylamino)phosphines, 223
Phosphinic acid
Enantioselective synthesis of phosphinyl peptidomimetics via an asymmetric Michael reaction of phosphinic acids with acrylate derivatives, 212
Phosphinidene
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered ArPCl$_2$ in solution at room temperature, 255
Phosphinimine
Lithium phosphonium azaylidiides R$_3$P–NLi. Applications in organic synthesis and coordination chemistry, 94
Phosphinyl peptidomimetics
Enantioselective synthesis of phosphinyl peptidomimetics via an asymmetric Michael reaction of phosphinic acids with acrylate derivatives, 212
Phosphonium
Lithium phosphonium azaylidiides R$_3$P–NLi. Applications in organic synthesis and coordination chemistry, 94
Phosphoranimines
Synthesis and reactivity of P-acetylenic (silylamino)phosphines, 223
Phosphorus
A role for free phosphinidenes in the reaction of magnesium and sterically encumbered ArPCl$_2$ in solution at room temperature, 255
The coordination number–photophysical properties relationship of trianthrylphosphorus compounds: doubly locked fluorescence of anthryl groups, 277
Phosphorus heterocycles
Metalated 1,3-azaphospholes: synthesis of lithium-1,3-benzazaphospholides and reactivity towards organoelement and organometal halides, 113
Synthesis of 2H-1,2-oxaphosphorin 2-oxides, 153
Phosphorylated tyrosine
Photo-Arbuzov rearrangements of cyclic phosphite systems, 239
Photo-Arbuzov
Photo-Arbuzov rearrangements of cyclic phosphite systems, 239
Photochemistry
The quest for triplet ground state silylenes, 68
Platinum
Transformations of organosilanes by Pt(II) complexes with hemilabile P,N-chelating ligands, 53
Polymerization
Bis(trifluoromethane)sulfonimide initiated ring-opening polymerization of octamethylcyclotetrasiloxane, 171

Bis(trifluoromethane)sulfonimide initiated ring-opening polymerization of octamethylcyclotetrasiloxane, 171
Reaction mechanisms
The quest for triplet ground state silylenes, 68
Reaction pathways
Reaction pathways towards 1,1,2,2-tetra^{t}butyldistannanes, 271
Reactions
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Reaction steps
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Reactivity
Lithium phosphonium azaylidiides R$_3$P–NLi. Applications in organic synthesis and coordination chemistry, 94

Silaboration
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Silicon
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Transformations of organosilanes by Pt(II) complexes with hemilabile P,N-chelating ligands, 53
Very strong anionic homoaromaticity in (*deloc*-1,3,4)-1-sila-3,4-diboracyclopentane-1-ides, the importance of the energy of the reference system for homoaromatic stabilization energies, 262
Siloxane
First siloxane tethered paracyclophane, 167
Silyl complexes
Transformations of organosilanes by Pt(II) complexes with hemilabile P,N-chelating ligands, 53
Silylene
The quest for triplet ground state silylenes, 68
Solid-state NMR spectroscopy
Octakis[(2,2,6,6-tetramethylpiperidino)methyl]octasilsesquioxane: synthesis and crystal structure analysis of a new aminoorganyl-functionalized octasilsesquioxane, 200
Stereochemistry
Regio- and stereoselective addition of sterically hindered silylboranes to terminal alkynes, 179
Structures
Imido analogs of aluminophosphates: syntheses and X-ray structures of $\{LiAl[OP(N^tBu)_2(NH^tBu)]_2\}_2$ and the mono- and di-methylaluminum complexes of the anions $[OP(N^tBu)_x(NH^tBu)_{3-x}]^-$ ($x = 1, 2$), 107
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Sulfurdiimidato
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Syntheses
Organoaluminum chemistry with low valent aluminum — recent developments, 4
Synthesis
Synthesis of 2H-1,2-oxaphosphorin 2-oxides, 153

Tellurate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
TelluriumIV
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
1,1,2,2-Tetratbutyldistannanes
Reaction pathways towards 1,1,2,2-tetra^{t}butyldistannanes, 271
Thallium
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, $[M(\eta^5\text{-}P_3C_2Bu^t_2)]$, M = Ga, Tl, 191
Thiatelluranitrogen-chemistry
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Tin
New synthetic approach and structural characterization of the chloroalkylstannanes $(Cl\text{–}CH_2)_n SnCl_{4-n}$ ($n = 2, 4$) and the hydrolysis product $[(ClCH_2)_2Sn(Cl)\text{–}O\text{–}Sn(Cl)(CH_2Cl)_2]_2$, 138
Some recent advances in the chemistry of silicon and its homologues in low coordination states, 39
Topology
Chemical applications of topology and group theory. Part 36. Deltahedral and fused deltahedral organometallic gallium and indium clusters, 146
Transannulation
$P(MeNMCH_2CH_2)_3N$: an effective catalyst for trimethylsilycyanation of aldehydes and ketones, 161
Transition metal
Cp^*GaCl_2 and Cp^*_2GaCl ($Cp^* = \eta^1\text{-}C_5Me_5$) as starting materials for novel Group 13 element complexes, 247
Trifluoroacetate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Trifluoromethylsulfonate
Acyclic and heterocyclic tellurathianitrogen compounds: a review on recent publications, 80
Triphospholyl ligands
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, $[M(\eta^5\text{-}P_3C_2Bu^t_2)]$, M = Ga, Tl, 191
Triplet ground state
The quest for triplet ground state silylenes, 68

UV spectrum
First siloxane tethered paracyclophane, 167
UV–vis absorption spectra
The coordination number–photophysical properties relationship of trianthrylphosphorus compounds: doubly locked fluorescence of anthryl groups, 277

X-ray crystallography
Synthesis and structural characterisation of the 3,5-di-*tert*-butyl-1,2,4-triphospholyl complexes of monovalent gallium and thallium, $[M(\eta^5\text{-}P_3C_2Bu^t_2)]$, M = Ga, Tl, 191
X-ray diffraction
Imido analogs of aluminophosphates: syntheses and X-ray structures of $\{LiAl[OP(N^tBu)_2(NH^tBu)]_2\}_2$ and the mono- and di-methylaluminum complexes of the anions $[OP(N^tBu)_x(NH^tBu)_{3-x}]^-$ ($x = 1, 2$), 107
X-ray structure
First siloxane tethered paracyclophane, 167

Zwitterionic pentacoordinate silicate
Octakis[(2,2,6,6-tetramethylpiperidino)methyl]octasilsesquioxane: synthesis and crystal structure analysis of a new aminoorganyl-functionalized octasilsesquioxane, 200
